# PRODUCT DATA SHEET: **VG100 MarkII & VG140 MarkII GYROSTABILIZERS**

*VG100 MarkII / VG140 MarkII*

| | |
|---|---|
| Angular Momentum | 100 / 140 kN.m.s |
| Rated Stabilizing Torque | 260 kN.m |
| Mass | 5640kg (12433lb) / 6540kg (14418lb) |
| Power | 25 – 35 ekW |
| Rated RPM | 3000 |
| Cooling Water | 160 lpm |
| Running Noise | Average 70 dBA |

*Note: Dimensions below exclude clearances. For more information, please ask VEEM Marine for a Product Installation Drawing*

VEEM Marine's mid frame size gyrostabilizer is a flexible alternative to multiple smaller gyros in vessels **110' – 165' (33 – 50m)** or can be installed in multiples to suit larger yachts, commercial and border protection/law enforcement vessels.

## VEEM MARINE ADVANTAGES INCLUDE

- Up to 95% roll reduction at rest or underway
- Fully maintainable in the vessel (inc. major overhauls)
- Highest stabilizing power per $ or kg/lb available
- Recirculating forced lubrication for long bearing life
- Epoxy coatings and corrosion resistant components
- Low noise emissions
- Telemetry for remote monitoring, diagnostics & updates
- 5-year / 3000hr warranty*

SCAN THE QR CODE TO FIND THE RIGHT VEEM MARINE GYRO FOR YOUR VESSEL

*To qualify, gyros must have a fully operational telemetry connection and an up-to-date VEEM Gyro service record.
