PRODUCT DATA SHEET: **VG520 & VG750 GYROSTABILIZERS**

	VG520SD / VG750SD
Angular Momentum	520 / 750 kN.m.s
Rated Stabilizing Torque	1000 kN.m
Mass	20100kg (44313lb) / 23100kg (50927lb)
Power	70 – 110 ekW
Rated RPM	1940
Cooling Water	235 lpm
Running Noise	Average 73 dBA

Note: Dimensions below exclude clearances. For more information, please ask VEEM Marine for a Product Installation Drawing

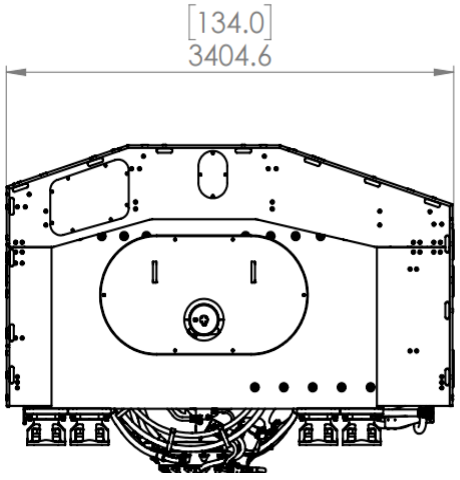

VEEM Marine's large frame gyrostabilizer offering up to 1000 kN.m of stabilizing torque for vessels ranging from **150' – 300'+ (approx. 45 – 100m +)**

VEEM MARINE ADVANTAGES INCLUDE

- Up to 95% roll reduction at rest or underway
- Fully maintainable in the vessel (inc. major overhauls)
- Highest stabilizing power per $ or kg/lb available
- Recirculating forced lubrication for long bearing life
- Epoxy coatings and corrosion resistant components
- Low noise emissions
- Telemetry for remote monitoring, diagnostics & updates
- 5-year warranty / 3000hr *

SCAN THE QR CODE TO FIND THE RIGHT VEEM MARINE GYRO FOR YOUR VESSEL

*To qualify, gyros must have a fully operational telemetry connection and an up-to-date VEEM Gyro service record.
