PERKO®

Fig. Nos. 0606 & 0607 Series L.E.D. Utility Light

The above lights are not designed for navigational use.

This is a 3/4" circle in order to scale internet printed templates

MOUNTING INFORMATION

Read all instructions before proceeding.

1). These instructions show the orientation of the light after the proper mounting location has been determined.
2). These lights are supplied with the proper circuit for operation on a nominal 12 volt system.
3). These lights contain no user serviceable components.
4). Draw a 8-1/2 inch long reference line through the center of the selected mounting location.
5). Cut out the mounting template below.Tape it on the mounting surface such that the reference line (drawn above) passes through the exact center of the template.
6). Drill four holes through the template as indicated for the #6 mounting screws and two or three holes 3/32" to 1/8" diameter to accommodate the wiring as indicated on template.
7). Wiring should be done by a qualified marine electrician. Attach supply connections to the light, making sure to wire in accordance with both A.B.Y.C. Standard E-9* and U.S. Coast Guard Safety Standards for Boat Electrical Systems (33CFR 183)* **Observe polarity**.
8). Attach the light to the mounting surface using #6 mounting screws.

* The above referenced standards can be obtained from:

(1). American Boat & Yacht Council, Inc.
613 Third Street, Suite 10
Annapollis, MD 21403

(2). U.S. Coast Guard
Washington, D.C. 20593
(or your local C.G. office)
